All Exede plans include the Video Data Extender. The Video Data Extender is a feature that streams video at DVD quality (optimized for 480p), which allows you to get more out of your monthly data allowance. This feature is turned on by default. Not all video sources are identifiable and available to benefit from the Video Data Extender. You can turn the Video Data Extender off or on at any time by visiting the Ruralportal at www.ctesc.net and logging in with your primary email address and password.
